Product & Operations Manager | App/Product Coordination, SOPs & Process Design, GTM & Growth Tracking

SUMMARY

- Product & Operations professional with **2+ years** coordinating app/product delivery end-to-end – working directly with engineering, design, QA, and external partners to turn requirements into specs, track milestones, and take releases from idea to launch across **8+ initiatives**.
- Hands-on operator comfortable building from scratch: designed **25+ SOPs/workflow configurations**, ran **400+ test scenarios** before release, and tracked **1,000+ post-launch outcomes** on dashboards to drive **20+ process and product improvements**. Thrives on ambiguity, competing priorities, and direct ownership.

SKILLS

- **Product & App Coordination:** Cross-Functional Coordination (Engineering, Design, QA), Milestone & Release Tracking, Requirements Gathering, PRDs & Acceptance Criteria, UAT Management
- **Operations & Process:** SOP Design & Process Improvement, Exception/Escalation Handling, Dependency Management, Structured Test Design, Root-Cause Analysis
- **Growth & Tracking:** Dashboards & Weekly Reporting, Performance Metrics, Stakeholder & Partner Management, Power BI
- **Technical:** Next.js, TypeScript, FastAPI, PostgreSQL, REST APIs, JSON, Git/GitHub, App Development Process Fluency

EXPERIENCE

Product Manager

May 2024 – Jun 2026

Phoenix Ferrous Pvt. Ltd.

Sangli

- Coordinated directly with Engineering, Design, QA, and **15+ business, operations, and client stakeholders** across **8+ product/workflow modules**, translating requirements into PRDs, decision logic, and acceptance criteria while tracking milestones, timelines, and release readiness end-to-end.
- Designed and maintained **25+ SOPs and workflow configurations**, validating each against **400+ test scenarios** covering exceptions, invalid inputs, and fallback handling to keep day-to-day operations reliable before every release.
- Took **6+ initiatives** from idea through requirements, configuration, UAT, and production go-live, coordinating Product, Engineering, and Operations while actively managing **30+ integration and requirement dependencies** to hit launch timelines.
- Built a dashboard-based tracking layer over **1,000+ post-launch outcomes** to monitor operational health weekly, surfacing recurring issues and converting them into **20+ process and business-logic improvements**.

Data Analyst Intern

Mar 2024 – May 2024

The Sparks Foundation | Reporting Automation & Analytics

- Built Power BI dashboards that automated weekly reporting, cutting manual effort by **40%** and improving reporting accuracy by **20%** for faster stakeholder visibility into performance.

PROJECTS

SignalLoop – Customer Experimentation Platform

2026

Next.js/TypeScript · FastAPI · PostgreSQL · JWT Auth

- Built solo, outside work, end-to-end – from database schema to a working V1 – turning structured customer data into evidence-backed decisions: customer → test → structured data → signal → insight → decision → next experiment.
- Modeled three cross-functional roles (PM, Field Tester, Admin); made explicit build/cut calls under time constraints to ship independently.

Netflix Viewer Intelligence – Consumer Streaming + Engagement Layer

2026

React · Explainable Intelligence Layer

- Built a Netflix-style consumer streaming UI solo, adding a viewer-intent intelligence layer – Smart Resume, spoiler-safe recaps, and notification-fatigue capping – with a dashboard explaining the *why* behind each intervention.

EDUCATION

Jain College of Engineering & Technology, Hubballi

2020 – 2024

Bachelor of Technology in Computer Science

CERTIFICATIONS

- Product Management – Udemy · Agile & Scrum – Udemy · Product Analytics – Pendo.io · Data Science & Artificial Intelligence – Boston Institute of Analytics
